**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Amendment*

1. Receipt is acknowledged of the Amendments filed on 13 August 2004.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 11 and 12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 6,450,404. Although the conflicting claims are not identical, they are not patentably distinct from each other because in claims 11 and 12 of the instant application, Applicant claim a ticket processing terminal carried by a trainman in a train comprising a receiver for receiving boarding data including a boarding section and designated data from a wireless ticket carried by a user in the train on which the boarding data is recorded through wireless communication, a display for displaying the boarding data received by the receiver, an operation unit operated by the trainman in

Art Unit: 2876

the train for directing change of the boarding data displayed on the display and change of the boarding data desired by the user, and a processing unit for changing the boarding data of which change is directed by the operation unit through wireless communication with a control center outside the train and is based on approval from the control center, wherein the ticket processing terminal is constructed and arranged to be located within the train, and a wireless communication controller that transmits the boarding data of which change is indicated by the operation unit to a storage unit storing the boarding data for plural wireless tickets and receives a propriety of change of boarding data transmitted from the storage unit wherein the processing unit updates boarding data of the wireless ticket through the wireless communication when it is received that the boarding data can be changed by the wireless communication controller.

Claims 1-7 of the U.S. Patent No. 6,450,404 show and disclose the storage unit serves as the in-compartment data control center for sending the data and judging whether the data is changeable and transmitting the result of the judgment, the ticket processing unit including a receiver or a wireless reader for wireless communication, display for displaying data, a first unit serves as an operation unit for directing the change of data on the display, a transmitter for wireless communication, and updating the data on the storage unit or the control unit.

Therefore, as discussed above, the scope of claims 11 and 12 of the present application and claims 1-7 of U.S. Patent No. 6,450,404 are practically identical.

***Response to Arguments***

3. Applicant's arguments with respect to claims 11 and 12 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
